## Summary

Hello all. I am Kha, a 5-year experienced web-based QA engineer. I had been experiencing in manual testing with black-box techniques. In almost recently 2 years, I researched and performed automation testing using JavaScript and Java programming languages for both SDK and UI/Functional projects. In next 2-3 years, I want to be more fluent with Automation testing and be one of the best in Manual testing also. Furthermore, in next 5 years, I want to become a Developer in Test Engineer.
